PROFESSIONAL EXPERIENCE:

1. **Current Organization: IBM India Pvt. Ltd.**
   Client: HSBC **August 2026 to Till Date**
   Designation: Senior Application Consultant.
   a. **ServCo:**

   Domain: Banking

   Role: ServiceNow Developer

   Responsibilities:

   - Developed and maintained **Service Catalogs** using **Flow Designer**, implementing end-to-end fulfillment processes based on business requirements.
   - Configured custom tables, forms, and lists to meet functional and business requirements.
   - Developed and configured **Business Rules, Client Scripts, Catalog Client Scripts, Script Includes, UI Policies, and UI Actions** to implement business logic and enhance platform functionality.
   - Built and customized **Service Portal** components, including **Pages** and **Widgets**, to enhance user experience

- Worked extensively with **Service Operations Workspace** (SOW) and **UI Builder** to enhance workspace functionality and user experience. Implemented '**My Approvals'** page for end users, enabling users to review and Approve/Reject requests directly from the workspace.
- Designed and configured **Database Views** by joining custom and out-of-box tables, including **Approvals, Requested Items, and Service Agreements**, to consolidate and display approval-related information within the workspace.
- Developed and configured **Transform Maps** using **Data Sources** to support data migration, including inserting and updating records in existing ServiceNow tables.
- Performed end-to-end testing of Service Catalog items and fulfillment flows, validating positive and negative scenarios against defined acceptance criteria and business requirements.
- Utilized **System Dependency / Dependency Check functionality** to identify potential downstream impacts of changes to table and field names. Analyzed affected scripts and platform functionalities, documented impacts, and updated dependency comments to support controlled and risk-aware changes.
- Worked on **Integrations** and explored different use cases on Personal Developer Instance.
- Exploring **HRSD module**, flows and **NowAssist in ITSM.**

2. **Current Organization: Cognizant Technology Solutions**
   Client: Gilead Sciences **July 2022 to July 2025**
   Designation: Senior Infra Developer.
   a. **Enhancements:**

   Domain: Pharmaceutical

   Role: ServiceNow Developer

   Responsibilities:

   - Developing and maintaining **Service Catalog Items** and **Record Producers** using **Workflows** and **Flow Designers**.
   - Provided analytical and technical expertise for **ServiceNow Configurations**.
   - Implemented a solution to **Integrate** with a third-party application using **Flow Designer** which triggers on **Catalog Item** creation and updates the corresponding records with relevant information and response received.
   - Development of **Service Catalog** which includes creating new catalog items, designing workflows and execution plans.
   - Developed and configured Business Rules, Client Scripts and Catalog Client Scripts, Script Includes, UI Actions and UI Policies.
